

Name _____

Who's Here?

Do you know how to find the attendance of people at a large event? There are too many people to count one by one, so you need to estimate. This is called crowd estimation.

1. Draw 3 lines top to bottom by connecting dot to dot. Draw 3 lines going across by connecting dot to dot. Find the box that is farthest left and on the bottom. Count as many people in the box as you can. _____

2. Estimate to find the total number of people.

number of people \times number of boxes = total number of people

_____ \times _____ = _____
